Drawings

1. Figures 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-5 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-4, the prior art fails to disclose or make obvious a large dimension image sensor operating by relative translation of the image with respect to the sensor comprising, in addition to the other recited features of the claim, the specific arrangement of first and second groups of individual monolithic chips and the specific wire connection between terminals of a package and terminals of each of the chips as recited in claim 1, wherein the upper surface of the package, on which the chip is mounted, comprises a principal part the shape of which is an elongate rectangle whose length is less than the length of the chip and whose width is greater than that of the chip, all of the connection terminals of the package lying inside this rectangle along the chip, all the chips having two ends protruding from the rectangle, a protruding end of a chip being adjacent, via a side parallel to the row of chips, to a side likewise parallel to the row

of chips of the protruding edge of another chip, the packages being identical and juxtaposed without reversal.

Regarding claim 5, the prior art fails to disclose or make obvious an image sensor comprising, in addition to the other recited features of the claim, a plurality of linear sensor arrays are mounted on packages whose upper surface has an elongate rectangular shape provided on two opposite sides of the rectangle with two extensions substantially covered by the ends of the arrays, two packages being adjacent via a respective extension of each of them, no connection terminal being present on the packages in the region of the extensions, and the packages being identical and juxtaposed without reversal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hosier et al (5,691,760) is cited for disclosing a plurality of photosensitive chips. Kochi (7,335,869) is cited for disclosing multi-chip type image sensor.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Pyo whose telephone number is (571) 272-2445. The examiner can normally be reached on Mon-Fri (with flexible hour), First Mon. off.
